

Session Prerequisites

To make the most effective use of your time in class, please spend some time reviewing the information below and completing a few prerequisite exercises.

- HTML
 - [Learn HTML](#)- Don't do the whole thing. Just do from the HTML HOME Page through the HTML Tables exercise.
 - [Learn CSS](#)- Don't do the whole thing. Just do from the CSS HOME Page through the CSS Align exercise.
- Browser Scripting
 - [Learn JavaScript](#)- Don't do the whole thing. Just do from the JS HOME Page through the JS Objects Intro exercise.
- JSON
 - [Learn JSON](#)- It is short.
- XML
 - [Learn XML](#)- Don't do the whole tutorial. Just do from the XML HOME Page through the XML Validation exercise.
- Web Design Concepts
 - [Review Web Design concepts](#) - Browse some of the articles under the Web Design Concepts heading.
- CCL

Exposure to CCL is a requirement for doing this course since half of the effort goes in fetching data that needs to be published in the MPages. [Discern Explorer \(CCL\) 1 WBT](#) would give a decent start if you are not familiar with CCL. You can search through [Learning](#) for other courses if needed for gaining expertise in CCL.

Session Follow-up Reading and Practice

- On same link for [Review Web Design concepts](#):

Study the following chapters

 - Introduction to the world of web standards: 1-2
 - Web Design Concepts: 1-2
 - HTML beginnings: 1-4
 - The HTML Body: 1-11
 - CSS: 1-12
 - JavaScript core skills: 1-14
